## **Influences of Population Control Policy on Chinese Family, in China**

*Yan Zhang, lecturer at the Nursing School, Tianjin Medical University, China*

Chinese Family Planning Policy started in the 1970s and was formulated as the law in 2001. Family Planning Policy changed the family structure in China thoroughly. Now, two-child policy was permitted recently. The family life style was influenced by such policy in China continuously. Then, what are the influences? We can introduce those to the students.

## **The care of elderly in China**

*Yue Zhao, Professor and Dean at the Nursing School, Tianjin Medical University, China*

China now has nearly 200 million people over the age of 60. A 2007 study by the United Nations estimated that in 2005 there were 16 retired people in China to every 100 workers. The study projected that this ratio will reach 64 elderly for every 100 workers by 2025. This is a tough challenge to deal with properly and a huge need for additional hospital and nursing home beds dedicated to senior care over the next years.
