

SCHOOL OF ENGINEERING, JÖNKÖPING UNIVERSITY, SWEDEN

INTERNATIONAL CAMPUSES

A UNIQUE OPPORTUNITY FOR
STUDENTS, COMPANIES AND UNIVERSITIES IN A GLOBAL COOPERATION

JÖNKÖPING UNIVERSITY
School of Engineering

THE INTERNATIONAL CAMPUSES ARE A COLLABORATIVE INITIATIVE TO INCREASE INTERNATIONALISATION.

- Student exchange (involving internship or project and thesis work) that is connected to companies.
- Research collaboration in connection with businesses, universities and partners in public and other domestic sectors.
- Commissioned education for corporate employees and students in higher education.

Sports and other activities are enjoyed at our international campuses.

Students can do an internship course and/or a final thesis project.

OUR VISION

INTERNATIONAL CAMPUS WILL BE LOCATED IN A REGION

- where Swedish and international companies have identified an important market today and for the future.
- that is appealing and attractive to students and staff.

Study visit at a 7-Eleven distribution central in Bangkok.

INTERNATIONAL CAMPUSES WILL BE A CITY

- with at least one university that is professional and suitable as a Jönköping University partner.
- where a Swedish corporate network exists.
- that has potential to recruit paying students to the School of Engineering and other faculties within Jönköping University.
- with safe and attractive accommodation.
- with good conditions for research collaboration.

Alumni and exchange students helping to recruit fee-paying students.

Meet and share experiences with people and cultures from around the world.

THESE ARE THE INTERNATIONAL CAMPUSES OF THE SCHOOL OF ENGINEERING: JTH-IC.

The School of Engineering (JTH) at Jönköping University has established international campuses for the purposes of education, research and cooperation with businesses in an international environment. This is what we call **JTH-IC**.

Network meeting with the Swedish Chamber of Commerce.

- **Campus South-East Asia**
Bangkok, Ho Chi Minh City, Singapore
- **Campus Brazil**
Sao Paulo, Curitiba, Florianapolis
- **Campus Carolinas, USA**
- **Campus Mexico, Mexico City**

Through JTH-IC, students can do their internship and/or thesis abroad in collaboration with a company, and usually in combination with academic studies. JTH-IC promotes companies that operate globally and that are in need of manpower, skills, research and development. The Swedish Chamber of Commerce together with companies and other relevant organisations in each region create student exchange opportunities through organised network meetings.

Students at Rangsit University, Bangkok.

Volvo is one of the partner companies of JTH.

“Volvo, Electrolux, Scania, Ericsson and Ikea are some of the international companies we cooperate with and where students can do their internship course and/or their final thesis project, but we also have domestic companies and other organisations that we collaborate with”

Roy Andersson, JTH-IC coordinator

STUDENTS INTERESTED IN JTH-IC.

For our students, the semester abroad is usually a combination of academic studies at a partner university and collaboration with a company in the area. Studying at a JTH-IC enriches the overall exchange programme.

COMPANIES INTERESTED IN JTH-IC.

Through JTH-IC, companies can help students carry out various projects over a longer period of time and benefit from an important exchange of knowledge. Equally, it's a chance for companies to get to know the students and assess them as potential employees.
